

Dear FCC, I would like to express my opinion that satellite radio (Both XM and Sirius) be allowed to offer any and all content that they may be able to purchase. I have heard rumors that the certain radio and TV stations have been urging the FCC to not allow this type of programming on satellite radio. As a taxpaying citizen, I don't believe this is fair. It is censorship at its worst. If either XM or SIRIUS has the money to buy the rights to broadcast the news or weather then it should be allowed.

I therefore respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve.
